EDUCATION

The University of Hong Kong (QS #11) Hong Kong, China
Master's Degree in Artificial Intelligence Sep 2025 - Aug 2027

University of Michigan, Ann Arbor (U.S. News #21, QS Top 50) Ann Arbor, MI, USA
B.S. in Computer and Data Science; Minor in User Experience Design | Dean's List Sep 2020 - Jun 2024

- Relevant Coursework:** Database Management Systems, Data Mining, Web Development, Machine Learning, Natural Language Processing (NLP), Macroeconomics and Microeconomics, Data Structures and Algorithms, Data Visualization, Statistics, Discrete Mathematics, Entrepreneurship

EXPERIENCE

MiniMax Shanghai, China
AI Product Growth Intern Feb 2026 - Jul 2026

- AI Product:** Supported releases across the M2.7 model and Agent product lines, including MaxClaw, MaxHermes, and Mavis Agent Teams; distilled product highlights into external launch messaging.
- AI Product Growth:** Compiled weekly user feedback and representative cases from Chinese and global social media, relayed primary insights to product teams, and amplified product reach through creator partnerships.
- Internal Agent Tool Development:** Built a creator lead-submission and outreach automation system with a local history database; developed a daily Feishu bot for AI news and trend monitoring, replacing manual scanning with scheduled updates.

ZhenFund Beijing, China
AI Product Investment & Operations Intern Jun 2025 - Sep 2025

- AI Research Product Development:** Built a one-click AI web-scraping Chrome extension with Cursor for rapid early-stage project screening; automatically extracted and structured product information, founder backgrounds, and core technology paths, saving the investment team 21+ hours of desk research per week.
- Industry Data & Investment Research:** Used Feishu Sheets to collect, extract, clean, deduplicate, and classify 6,000+ product and industry records; tracked market developments across channels and produced weekly AI investment research briefs.
- Investment Decision Support:** Conducted primary research through expert interviews and meeting-note analysis; supported project tracking, sector assessment, and investment committee discussions; synthesized recurring product forms, business models, and founder profiles into data and case evidence.

Deloitte Shenzhen, China
Data Science Intern Dec 2024 - Mar 2025

- AI Product Development:** Used Cursor with Coze/Dify to build task-specific AI Agent workflows and an industry research Agent system; automated broker information collection and CSV downloads for institutional evaluation frameworks.
- Model Training & Evaluation:** Modeled customer profiles for a major bank credit-card project, developed a multi-factor customer satisfaction model, and integrated AI, machine learning, and NLP methods into a holistic customer-experience evaluation framework.
- Market Research:** Assessed the impact of large language models and AGI across industries and their applications in banking, securities, and private equity; supported forward-looking industry recommendations and solutions for initial client engagement.

AI4ALL (Nonprofit AI education program founded by Stanford Professor Fei-Fei Li; AI & Big Data track) Boston, MA, USA
AI Product Lead Jun 2022 - Sep 2022

- AI Teaching & Program Management:** Co-ran a 10-week Boston summer program, taught AI fundamentals, and organized student visits to leading AI companies in the region.
- Model Training & Evaluation:** Researched BERT-based student employment outcome assessment; owned text processing and exploratory data analysis (EDA) and contributed to the research paper.

PROJECTS

- [Prompt.ai](#) | **Live on the Chrome Web Store:** Independently built a prompt assistant extension that auto-completes and optimizes prompts for the user's current context.
- [Skills Master](#) | **Agent Skill Marketplace:** Built a Skill marketplace for the Agent ecosystem that standardizes and categorizes community skills and enables one-click installation.
- Token Hit | Claude Code Usage Monitor:** Tracks and visualizes Claude Code token usage so individual subscribers can understand their daily spend.

SKILLS

- Programming:** Cursor, Codex, Claude, Python (NumPy, Pandas, scikit-learn, Hugging Face), Java, C++, R, SQL, JavaScript, MATLAB, HTML/CSS
- Analytics:** Database Systems (MySQL, MongoDB), Google Analytics, SPSS, A/B Testing
- Interests:** Oil painting, skiing, surfing, scuba diving, bodybuilding
